PROFESSIONAL SUMMARY

Flutter Lead Engineer with 9+ years of software development experience, including 5+ years in Flutter and growing experience in Python backend development. Expertise in designing scalable cross-platform applications for Android, iOS and Web, RESTful integrations, Clean Architecture, CI/CD automation, and leading engineering teams.

Passionate about AI-powered development, Agentic AI systems, and building end-to-end solutions across mobile and backend platforms. Strong track record in CI/CD automation, reducing release cycles, and mentoring developers to improve team productivity.

Expertise in Flutter, Dart, Clean Architecture, and DevOps practices, with a focus on building maintainable, scalable, and high-quality mobile applications aligned with business goals.

CORE SKILLS

Mobile & Flutter Development

Flutter, Dart, Android (Kotlin/Java), iOS (Swift - basic), React Native, Cross-platform development

Architecture & Design

Clean Architecture, MVVM, Modularization, Scalable Systems, Design Patterns

State Management

BLoC, Riverpod, Provider, GetX, MobX

Backend & Integration

REST APIs, GraphQL, Python (FastAPI, Flask - Beginner), Microservices Integration, Offline-first Architecture

CI/CD & DevOps

GitHub Actions, GitLab CI, Fastlane, Automated Testing, Deployment Pipelines, SonarQube

Testing & Quality

Unit Testing, Widget Testing, Integration Testing, Code Reviews, Performance Optimization

Analytics & Engagement

Firebase Analytics, Crashlytics, Appsflyer, MoEngage, Clevertap, Push Notifications

Leadership & Collaboration

Team Leadership, Mentorship, Agile/Scrum, Stakeholder Communication, Technical Decision Making

LEADERSHIP EXPERIENCE

- Led a team of 4–6 mobile developers, providing technical guidance, code reviews, and mentorship
- Owned end-to-end feature delivery from requirement analysis to production deployment
- Collaborated with cross-functional teams in Agile/Scrum environments to ensure predictable delivery
- Conducted architecture discussions and drove technical decision-making across projects
- Established coding standards, best practices, and modular architecture guidelines
- Improved team productivity by introducing reusable components and scalable architecture
- Facilitated Sprint Planning, Backlog Grooming, Sprint Review and Retrospective ceremonies
- Worked closely with Product Owners to refine user stories, estimate efforts and prioritize roadmap items
- Participated in capacity planning, sprint estimation and release planning
- Tracked sprint progress and mitigated delivery risks proactively

ARCHITECTURE & SYSTEM DESIGN

- Designed scalable mobile architectures using Clean Architecture and MVVM
- Built modular, reusable component-based systems for faster development
- Architected offline-first applications with sync and fallback mechanisms
- Integrated microservices-based backend systems using REST & GraphQL
- Designed CI/CD pipelines for automated build, testing, and deployment

CI/CD & DEVOPS

- Designed and implemented CI/CD pipelines using GitHub Actions and GitLab CI
- Automated build, test, and deployment workflows for Android & iOS
- Integrated Fastlane for release automation and version management
- Reduced deployment time by 40% and improved release reliability

AI & PYTHON DEVELOPMENT

Python & AI Development

Python, FastAPI, Flask, API Development, Automation Scripts,
Prompt Engineering, AI-assisted Development,
Agentic AI Concepts, OpenAI APIs, LLM Integrations

PROFESSIONAL EXPERIENCE

Jan 2025 - Nov 2025

Bengaluru, India (Remote)

Software Engineer – Flutter(Lead Responsibilities) / Mindmap Technologies

- Led design and development of scalable Flutter applications using Clean Architecture
- Led sprint planning, backlog refinement and release planning activities
- Collaborated with Product Managers and stakeholders to define

sprint goals and prioritize feature delivery

- Participated in sprint reviews and retrospectives, driving continuous improvement initiatives
- Built modular, reusable components improving development efficiency
- Owned CI/CD pipeline implementation using GitHub Actions & GitLab CI
- Reduced release cycle time by around 40% through automation
- Reduced production crash rate by around 30% through performance optimization
- Integrated REST & GraphQL APIs with robust error handling mechanisms
- Collaborated with cross-functional teams for smooth delivery and release planning
- Leveraged AI tools (Cursor, Windsurf) to accelerate development and refactoring

Jun 2023 - Jan 2025
New Delhi, India

Flutter Developer (Senior/Acting Lead Respons.) / Mobikasa

- Led key modules of an E-commerce Flutter app with 500K+ downloads
- Owned architecture and implementation of loyalty & rewards system
- Participated in Agile ceremonies including sprint planning, story estimation and retrospectives
- Improved checkout success rate by around 25% through UX and performance improvements
- Guided team in modular architecture and scalable code practices
- Integrated Shopify, REST & GraphQL APIs for dynamic product flows
- Drove analytics implementation using MoEngage, Clevertap & Firebase
- Built dashboards and analytics-driven features for business insights
- Improved app performance across Android, iOS, and Web platforms
- Coordinated with Product, QA and Backend teams to deliver features within sprint commitments

Oct 2022 - Jun 2023
Noida, India (Remote)

Flutter Developer / Alertus Technologies

- Developed responsive multi-platform Flutter applications (Android, iOS, Web)
- Improved application stability by 20% using integration testing
- Established code review workflows and documentation standards
- Implemented accessibility features following WCAG guidelines
- Drove adoption of best practices and modern Flutter architecture

Dec 2020 - Oct 2022
New Delhi, India (Remote)

Android + Flutter Developer / SunTec India

- Developed and maintained high-traffic mobile apps (500K+ downloads)
- Refactored legacy codebases using MVVM and modular architecture

- Implemented CI/CD pipelines improving deployment efficiency
- Improved conversion rates by 25% through UX enhancements
- Delivered production-grade apps with strong performance and stability

EARLY CAREER SUMMARY

Android Developer – Ads & Url (Apr 2020 – Dec 2020)

Android Developer – Ecomaxgo LLP Solutions Pvt. Ltd. (Jun 2019 – Apr 2020)

Android Developer – Delaine Technologies Pvt. Ltd. (Oct 2017 – Jun 2019)

Android Developer Intern – Hartron Franchise Division (Aug 2017 – Feb 2018)

- Built and launched production Android applications end-to-end, including Play Store releases.
- Strong foundation in Java, Android SDK components, Material Design, and clean code practices.

ACHIEVEMENTS

- Reduced production crash rate by 30% through optimization
- Improved release cycle time by 40% via CI/CD automation
- Increased checkout success rate by 25% in E-commerce app
- Delivered multiple high-download apps (500K+ users)
- Recognized by clients for early delivery and product stability

PYTHON PROJECTS

Python Backend Projects

- Developed REST APIs using FastAPI and Python for learning and backend experimentation
- Built automation scripts to improve development workflows
- Explored AI integrations using OpenAI APIs and Agentic AI concepts
- Implemented authentication, API routing and database connectivity using Python frameworks

ADDITIONAL

- Experience with AI-assisted development tools (Cursor, Windsurf)
- Passionate about scalable systems, performance optimization, and clean code
- Strong problem-solving and ownership mindset

EDUCATION

Jul 2017
Hisar

Bachelor of Science in Computer And Information Sciences
Govt. P.G. College
